JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY

Vol. 270 Nos. 1 + 2 October 10, 1989

CONTENTS

Theoretical comparison of linear scan and staircase anodic stripping voltammetry. Restricted and infinitive diffusion
M. Penczek, Z. Stojek (Warsaw, Poland) and J. Buffle (Geneva, Switzerland) 1
On the validity of the Avrami theorem in the case of decelerating growth
W.H. Mulder, J.H.O.J. Wijenberg, M. Sluyters-Rehbach and J.H. Sluyters (Utrecht,The Netherlands) 7
Light scattering from a nucleating surface. Part II
P.A. Bobbert, W. Kruijt, M. Sluyters-Rehbach and J.H. Sluyters (Utrecht, The Netherlands) ... 21
Theory of the steady-state current of a redox couple at interdigitated array electrodes of which pairs are insulated electrically by steps
K. Aoki (Yokohama, Japan) 35
On-line compensation of ohmic drop in submicrosecond time resolved cyclic voltammetry at ultramicroelectrodes
C. Amatore, C. Lefrou and F. Pflüger (Paris, France) 43
CPRM: a new method for quantitative detection of peroxide formation during oxygen reduction using the rotating ring–disc electrode technique
N.R.K. Vilambi and E.J. Taylor (Andover, MA, U.S.A.) 61
Kinetic parameters from steady-state voltammograms at microdisc electrodes
K.B. Oldham, J.C. Myland (Peterborough, Canada), C.G. Zoski and A.M. Bond (Geelong, Australia) 79
Solvent effects on simple electron transfer reactions. A comparison of results for homogeneous and heterogeneous systems
W.R. Fawcett and C.A. Foss, Jr. (Davis, CA, U.S.A.) 103
The kinetics of electroreduction of Cr(III) at mercury in dimethylformamide solutions
W.R. Fawcett (Davis, CA, U.S.A.) and K. Markušová (Košice, Czechoslovakia) 119
Electrocatalysis by thallium adatoms of the oxidation of formic acid on platinized platinum
V.E. Kazarinov (Moscow, U.S.S.R.), R.R. Adzic (Belgrade, Yugoslavia), V.N. Andreev and A.N. Zhuchkov (Moscow, U.S.S.R.) 137
A kinetic study of the oxidation of glyoxal on platinum-based electrodes by chromatographic techniques
E.M. Belgsir, H. Huser, C. Lamy and J.-M. Léger (Poitiers, France) 151
The formation of a compact polymer film on a copper electrode from benzimidazole solution
G. Xue, J. Ding, P. Wu and G. Ji (Nanjing, People's Republic of China) 163
Thermal electron excitation as a probe for chemical and electrochemical steps in the anodic dissolution of III–V semiconductor electrodes
D. Vanmaekelbergh, C.W. Hoogendam and J.J. Kelly (Utrecht, The Netherlands) 175
Kinetic study on the dimerization reaction of 9-methoxyanthracene cation radical by means of fast scan cyclic voltammetry
K. Nozaki, M. Oyama, H. Hatano and S. Okazaki (Kyoto, Japan) 191
Kinetics and mechanism of "reduced CO_2" electrooxidation on electrodispersed platinum in different acid solutions
M.L. Marcos, J. González-Velasco, J.M. Vara (Madrid, Spain), M.C. Giordano and A.J. Arvia (La Plata, Argentina) 205
In-situ IR spectroscopy with a gas diffusion cell. CO adsorption and oxidation on Pt
J. Lu (Wuhan, People's Republic of China) and A. Bewick (Southampton, Great Britain) 225
The effect of glucose on electroreduction of phosphate at a Pt electrode. An indirect method of glucose detection in KRPB solution
S.U.M. Khan and G. Liu (Pittsburgh, PA, U.S.A.) 237
The cathodic cleavage of aromatic sulphonamides: an elegant way to produce amino radicals themselves fully characterized by means of the spin marking technique
R. Kossai, B. Emir, J. Simonet (Rennes, France) and G. Mousset (Aubière, France) 253
Electrochemical reduction of heptyl viologen at platinum studied by time-resolved resonance Raman spectroscopy
M. Osawa and W. Suëtaka (Sendai, Japan) 261
Electrocatalytic properties of metal adatoms in a potential range negative to Nernstian bulk deposition
X. Xing and D. Scherson (Cleveland, OH, U.S.A.) 273

(continued on p. 3 of cover)

Contents (*continued*)

Analysis of the photocurrent transient behaviour associated with flatband potential shifts during water splitting at n-TiO_2 electrodes
D. Tafalla and P. Salvador (Madrid, Spain) 285

Electrochemically distinguishable states of fericytochrome *c* and their transition with changes in temperature and pH
T. Ikeshoji (Sendai, Japan), I. Taniguchi (Kumamoto, Japan) and F.M. Hawkridge (Richmond, VA, U.S.A.) 297

Some consequences of mixed and dilute surface modification of gold electrodes for protein electrochemistry
H.A.O. Hill and G.A. Lawrance (Oxford, Great Britain) 309

The growth of compact layers at the electrode interface. Part IV. Fractal character of uracil films at the mercury–aqueous electrolyte interface
T. Wandlowski and L. Pospíšil (Prague, Czechoslovakia) 319

Influence of specific adsorption of anions on the electrochemical behaviour of the Pt (100) surface in acid medium. Comparison with Pt (111)
D. Armand and J. Clavilier (Meudon, France) 331

Cation effects on the vibrational frequencies of adsorbed thiocyanate on platinum
K. Ashley, M.G. Samant, H. Seki and M.R. Philpott (San Jose, CA, U.S.A.) 349

The effect of supporting electrolyte and temperature on the rate of charge propagation through thin films of $[Os(bipy)_2PVP_{10}Cl]Cl$ coated on stationary electrodes
R.J. Forster, A.J. Kelly, J.G. Vos and M.E.G. Lyons (Dublin, Ireland) 365

The adsorption of tetraethylammonium ions at a mercury electrode from perchlorate solutions
J. Torrent, R. González, F. Sanz (Barcelona, Spain) and M. Molero (Sevilla, Spain) 381

Short communications

Silicon polytungstate $(SiW_{12}O_{40})^{4-}$-derivatised titanium dioxide (TiO_2)/electrolyte interfaces
W.-T. Wu and A.J. McEvoy (Lausanne, Switzerland) 395

The indirect anodic oxidation of *m*-phenoxytoluene mediated by brominated aryl amines
D. Pletcher and G.D. Zappi (Southampton, Great Britain) 401

Reduction of methyl viologen in a resistive water-in-oil microemulsion
Z. Wang, A. Owlia and J.F. Rusling (Storrs, CT, U.S.A.) 407

Surface structural changes of evaporated thin silver film electrodes during the adsorption of chloride ion
R.I. Tucceri and D. Posadas (La Plata, Argentina) 415

Preparation of highly conducting polyanilines
K. Yoshikawa, K. Yoshioka, A. Kitani and K. Sasaki (Hiroshima, Japan) 421

Frequency resolved transmittance measurements on polyaniline films
R.S. Hutton, M. Kalaji and L.M. Peter (Southampton, Great Britain) 429

Preliminary notes

Photoelectrochemical behavior of an azobenzene derivative in Langmuir–Blodgett films. Enhanced reduction via the participation of its excited states
Z.F. Liu, B.H. Loo, R. Baba and A. Fujishima (Tokyo, Japan) 437

Electrochemical incorporation of lithium into palladium from aprotic electrolytes
F. Dalard (Saint Martin d'Hères, France), M. Ulmann, J. Augustynski and P. Selvam (Geneva, Switzerland) 445

Production of tritium from D_2O electrolysis at a palladium cathode
N.J.C. Packham, K.L. Wolf, J.C. Wass, R.C. Kainthla and J.O.'M. Bockris (College Station, TX, U.S.A.) 451

In situ characterization of platinum particles dispersed in Nafion films on gold electrodes by infrared spectroscopy
M. Osawa, T. Nakane, K. Ito and W. Suëtaka (Sendai, Japan) 459

The electrochemical generation of surfaces of specific crystallographic orientation on gold single crystal sphere electrodes
T.A. Twomey (Berlin, F.R.G.) 465

Thin layer electrochemistry in a paper matrix: electrochromography of Prussian Blue and two bipyridilium systems
D.R. Rosseinsky and J.L. Monk (Exeter, Great Britain) 473

An ellipsometric study of polypyrrole films on platinum
A. Hamnett, S.J. Higgins (Oxford, Great Britain), P.R. Fisk and W.J. Albery (London, Great Britain) 479
